

Akshay (Ash) Deshmukh

☎07785779810 | ♥Blackpool | ✉ deshmukhakshay321@gmail.com | [LinkedIn](#) | [Portfolio](#)

Pricing Analyst and Business Data Analyst with 3+ years of experience across manufacturing, commercial analytics, housing, and data-driven business environments. Skilled in pricing analysis, SQL, Python, Power BI, Excel, KPI reporting, dashboard development, and large dataset analysis to support commercial decision-making and profitability improvement. Experienced in developing reporting solutions, analysing market and operational trends, and collaborating with finance, operational, and senior stakeholder teams to improve pricing strategy and business performance. **MSc Data Science and MSc Statistics graduate** with strong statistical and analytical expertise, delivering measurable improvements in reporting efficiency, forecasting accuracy, and commercial insights.

CERTIFICATIONS and SKILLS

- | | | |
|----------------------------------|--------------------------|----------------------------------|
| – Python | – Dashboard Development | – Cross-Functional Collaboration |
| – Power BI | – Forecasting | – Problem Solving |
| – SQL (Advanced) | – Business Intelligence | – Stakeholder Management |
| – Excel | – Performance Tracking | – Critical Thinking |
| – Commercial Analysis | – Requirements Gathering | – Attention to Detail |
| – KPI Reporting | – Process Improvement | |

WORK EXPERIENCE

Business and Data Analyst – [Stoke-on-Trent City Council](#)

January 2025 – Present

- Analyse large operational and financial datasets using SQL, Excel, and Power BI to identify spend trends, service performance patterns, and operational inefficiencies, supporting data-driven commercial and budgeting decisions across housing and repairs functions.
- Developed and maintained KPI dashboards tracking 1M+ repair records, appointment activity, and operational performance, enabling senior stakeholders to monitor service delivery, customer behaviour trends, and resource utilisation in real time.
- Produced monthly and ad hoc performance reports for leadership teams, improving reporting accuracy and reducing manual reporting effort by over 60% through automation using Power Query, Excel formulas, and optimised SQL processes.
- Conducted process reviews and gap analysis across reporting workflows, identifying opportunities to improve governance, reporting efficiency, and data integrity, resulting in a 15–20% improvement in reporting accuracy.
- Collaborated with finance, operational, and service teams to gather business requirements, define reporting logic, and implement analytical solutions aligned with organisational performance objectives.
- Improved reporting reliability and dashboard performance by optimising SQL queries and restructuring data models, reducing dashboard load times by approximately 30% while enhancing usability for operational stakeholders.

Data Scientist – [Shreyas Technosoft](#)

June 2023 - September 2023

- Developed a competitive pricing intelligence pipeline using Python and Azure, enabling pricing teams to monitor competitor pricing trends in near real time and improve commercial response times by 80%.
- Built forecasting models using ARIMA and Facebook Prophet on 3M+ rows of sales data, supporting pricing optimisation, demand forecasting, and inventory planning decisions that reduced stock overheads by 18%.
- Implemented automated data validation and quality checks across multiple client datasets, achieving 99.5% data accuracy and improving confidence in commercial and analytical reporting outputs.
- Collaborated with cross-functional technical and commercial teams to deliver data-driven analytical solutions supporting pricing strategy, operational performance, and business growth initiatives.
- Delivered reporting outputs and analytical insights to senior stakeholders, translating complex findings into actionable recommendations that supported strategic decision-making.

Data Science Intern – [Shreyas Technosoft](#)

September 2021 - May 2023

- Analysed customer, sales, and market trend data using Python, Power BI, and statistical modelling techniques to support forecasting, pricing optimisation, customer segmentation, and revenue planning initiatives.
- Built interactive Power BI dashboards consolidating multi-source commercial datasets, reducing over 35 hours of monthly manual reporting and improving visibility of operational and pricing KPIs for senior stakeholders.
- Supported the development of AI-driven business intelligence solutions that streamlined content optimisation and reporting workflows for B2B commercial teams.

EDUCATION

MSc Data Science and Analytics, University of Leeds, UK

September 2023 – September 2024

- **Merit | Russell Group** | Modules: Programming, Time Series, Regression, DL, ML

MSc Statistics, Pune University, India

August 2021 – May 2023

- **Distinction** | Modules: Probability Theory, Bayesian Inference, Calculus, Linear Algebra, R, SAS.

INDEPENDENT PROJECTS

- **Dealing with multiple missing values (Masters)** – Analysed mobile features dataset, implementing various imputation methods to maintain data integrity.
- **Income Prediction (Guided)** – Implemented machine learning models to predict income, leveraging advanced analytical techniques and GitHub for streamlined project management.
- **Work-Life Balance (Post-Graduation)** – Conducted peer-reviewed primary data acquisition and statistical analysis on government and private sector employees, deriving actionable insights.
